# NumPy Exercises

Now that we've learned about NumPy let's test your knowledge. We'll start off with a few simple tasks, and then you'll be asked some more complicated questions.

#### Import NumPy as np

```
import numpy as np
```

#### Create an array of 10 zeros

```
a=np.zeros(10)
a
array([0., 0., 0., 0., 0., 0., 0., 0., 0.])
```

#### Create an array of 10 ones

```
b=np.ones(10)
b
array([1., 1., 1., 1., 1., 1., 1., 1., 1.])
```

#### Create an array of 10 fives

```
c=np.full(10,5.0)
c
array([5., 5., 5., 5., 5., 5., 5., 5., 5.])
```

#### Create an array of the integers from 10 to 50

#### Create an array of all the even integers from 10 to 50

```
e =[num for num in range(10, 51) if num % 2 == 0]
print(e)
[10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42,
44, 46, 48, 50]
```

Create a 3x3 matrix with values ranging from 0 to 8

Create a 3x3 identity matrix

Use NumPy to generate a random number between 0 and 1

```
h=np.random.rand()
h
0.6768077861431797
```

Use NumPy to generate an array of 25 random numbers sampled from a standard normal distribution

Create the following matrix:

```
0.33,

0.34, 0.35, 0.36, 0.37, 0.38, 0.39, 0.4, 0.41, 0.42, 0.43,

0.44,

0.45, 0.46, 0.47, 0.48, 0.49, 0.5, 0.51, 0.52, 0.53, 0.54,

0.55,

0.56, 0.57, 0.58, 0.59, 0.6, 0.61, 0.62, 0.63, 0.64, 0.65,

0.66,

0.67, 0.68, 0.69, 0.7, 0.71, 0.72, 0.73, 0.74, 0.75, 0.76,

0.77,

0.78, 0.79, 0.8, 0.81, 0.82, 0.83, 0.84, 0.85, 0.86, 0.87,

0.88,

0.89, 0.9, 0.91, 0.92, 0.93, 0.94, 0.95, 0.96, 0.97, 0.98,

0.99])
```

Create an array of 20 linearly spaced points between 0 and 1:

## Numpy Indexing and Selection

Now you will be given a few matrices, and be asked to replicate the resulting matrix outputs:

```
mat = np.arange(1, 26).reshape(5, 5)
mat
array([[1, 2, 3, 4, 5],
       [6, 7, 8,
                     9, 10],
       [11, 12, 13, 14, 15],
       [16, 17, 18, 19, 20],
       [21, 22, 23, 24, 25]])
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
# BE ABLE TO SEE THE OUTPUT ANY MORE
mat[2:6,1:6]
array([[12, 13, 14, 15],
       [17, 18, 19, 20],
       [22, 23, 24, 25]])
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
# BE ABLE TO SEE THE OUTPUT ANY MORE
```

```
mat[3:4,4:6]
array([[20]])
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
# BE ABLE TO SEE THE OUTPUT ANY MORE
mat[0:3,1:2]
array([[ 2],
       [7],
       [12]])
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
# BE ABLE TO SEE THE OUTPUT ANY MORE
mat[4:6,0:6]
array([[21, 22, 23, 24, 25]])
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
# BE ABLE TO SEE THE OUTPUT ANY MORE
mat[3:6,0:6]
array([[16, 17, 18, 19, 20],
       [21, 22, 23, 24, 25]])
```

### Now do the following

Get the sum of all the values in mat

```
l=np.sum(mat)
l
325
```

Get the standard deviation of the values in mat

```
m=np.std(mat)
m
7.211102550927978
```

Get the sum of all the columns in mat

```
n=np.sum(mat,axis=0)
n
array([55, 60, 65, 70, 75])
```
